IoTE Solo Mining Guide

1.

Visit the official IoTE website at https://www.iote.one/ to download the latest version of IoTE's wallet program.Open the wallet client and make sure the sync is complete.
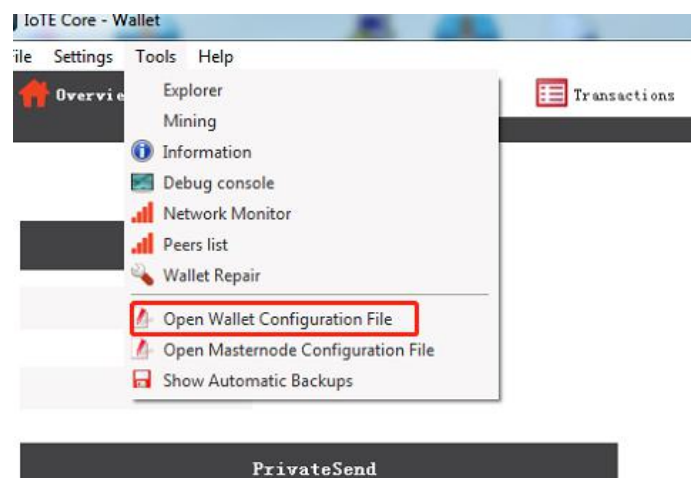

Open the wallet profile (Tools)
Copy the following directly to paste:
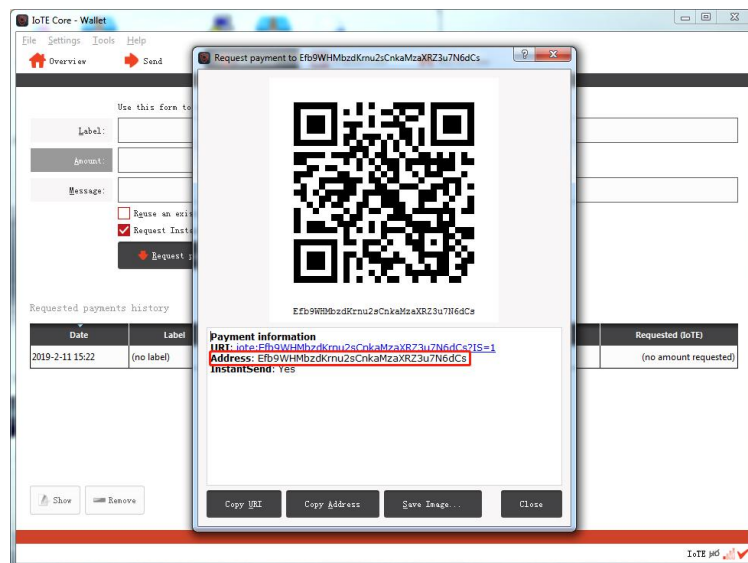

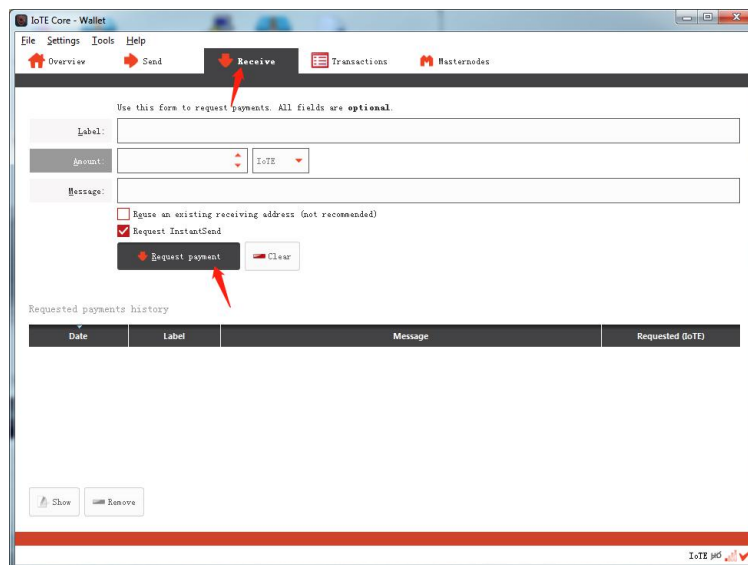

rpcuser=1

rpcpassword=1

rpcport=9999

server=1

listen=1

daemon=1

Save notepad.

2. **Restart the IoTE wallet client.(important)**

Remember the address

The above picture is: Efb9WHMbzdKrnu2sCnkaMzaXRZ3u7N6dCs

3. Download the IoTE's mining tool.

https://github.com/IoTEChain/cpuminer-CryptoVantaa/releases

Open config.json with Notepad

```
{
        "url" : "http://127.0.0.1:9999",
        "user" : "1",
        "pass" : "1",
        "coinbase-addr":"EX2BqaFX5szoE8kcwJLmsegJrsy9Ha7xqE"
}
```

4.

Replace the wallet address inside with your Efb9WHMbzdKrnu2sCnkaMzaXRZ3u7N6dCs

Keep the IoTE's wallet open and run start miner.bat.

pthreadGC-3.dll
start miner.bat
zlib1.dll
